

 ASTON MARTIN N24

 SPORTS EXHAUST

The Aston Martin N24 V8 Vantage is being offered by Aston Martin as a 'turnkey' racecar eligible for a variety of championships. Named after the Nürburgring 24 Hour Race (where it debuted) they are being campaigned successfully in the new European GT4 championship, French Rally championship and in various national series such as the UK's AMOC championship.

The special exhaust system supplied with the car is significantly lighter than the standard V8's system but, as it is designed to suit the most stringent scrutineers, it is surprisingly quiet – actually quieter than the standard system up to 5000 rpm.

QuickSilver was approached by a team running two N24s in various championships with the request to make an exhaust system that was lighter and produced a more appropriate racecar sound – louder. For use where the increased volume was acceptable.

The QuickSilver Team redesigned the silencer internals and manufactured the result using thinner-gauge material to successfully meet these parameters.

The QuickSilver system provides a louder soundtrack throughout with a wonderful howl at higher rpm. A weight reduction of over 5.4 kgs (~11.9lbs) over the standard unit means handling and braking are improved even further.

The strikingly coloured car pictured is run by the Ecurie Bagatelle team in the European GT4 Championship and owned by David & Sandra Brooker-Carey to publicize their new Motorsport, Equestrian, Museum and Hotel facility in the Dordogne area of south west France. Opening in 2009 see: www.projectbagatelle.com

We are grateful for the help and input of Steve Hay at SMH Motorsport see: www.smhmotorsport.co.uk

Superior Exhausts for the World's Finest Cars

ASTON MARTIN N24

POWER

More power throughout

SOUND

	Factory N24 exhaust	QuickSilver N24 Exhaust	Standard V8 Vantage Exhaust
Idle	72 dB	84 dB	71 dB
2000 rpm	77 dB	90 dB	81 dB
4000 rpm	86 dB	101 dB	88 dB
6000 rpm	98 dB	104 dB	96 dB

Scrut. Test

Note:
These tests were conducted in similar conditions with an AZ digital sound level meter on a concrete apron. Results will vary according to a variety of factors

WEIGHT

Aston Martin Factory Silencer	17.0kgs (~ 37.4lbs)
QuickSilver 'Sports' Silencer	11.6kgs (~25.5lbs) > Saving 5.4kgs (~ 11.9lbs)
